Rapport 1

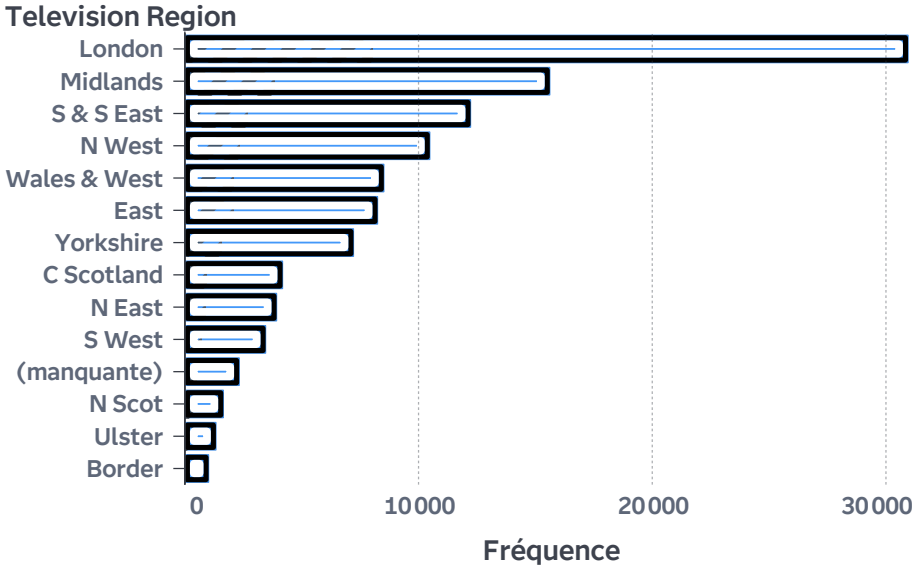

Date de création : lundi 2 novembre 2026, 21:41:06

Auteur : mathura.santhalingam@edu.univ-paris13.fr

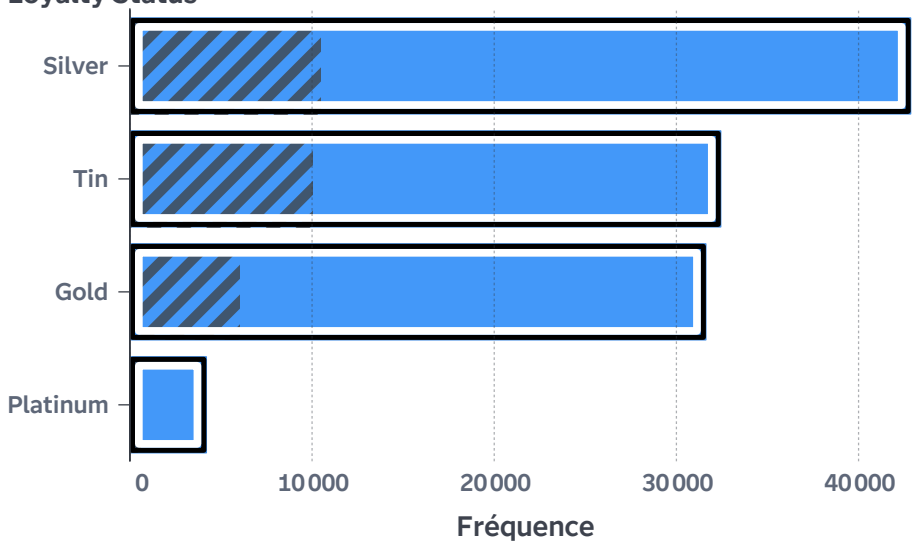

Fréquence sur Organics Purchase Indicator

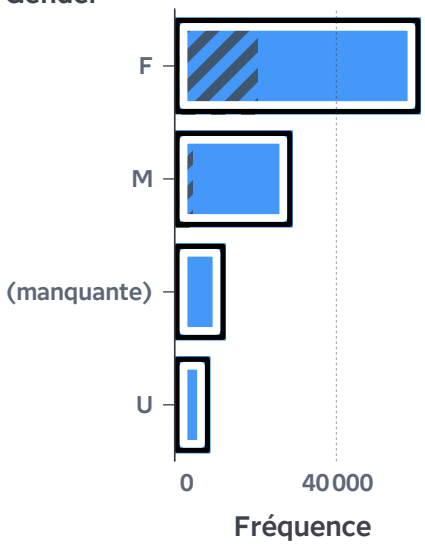

Fréquence sur Television Region

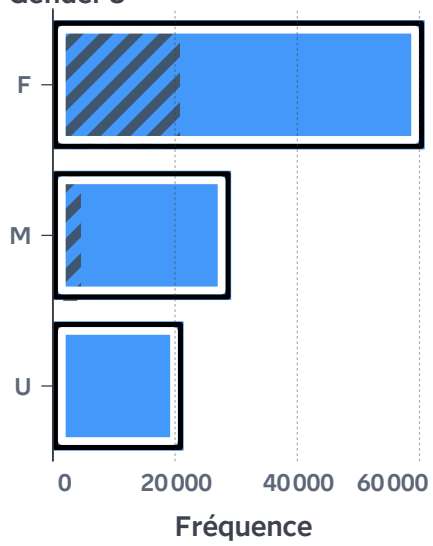

Fréquence sur Loyalty Status

Fréquence sur Gender

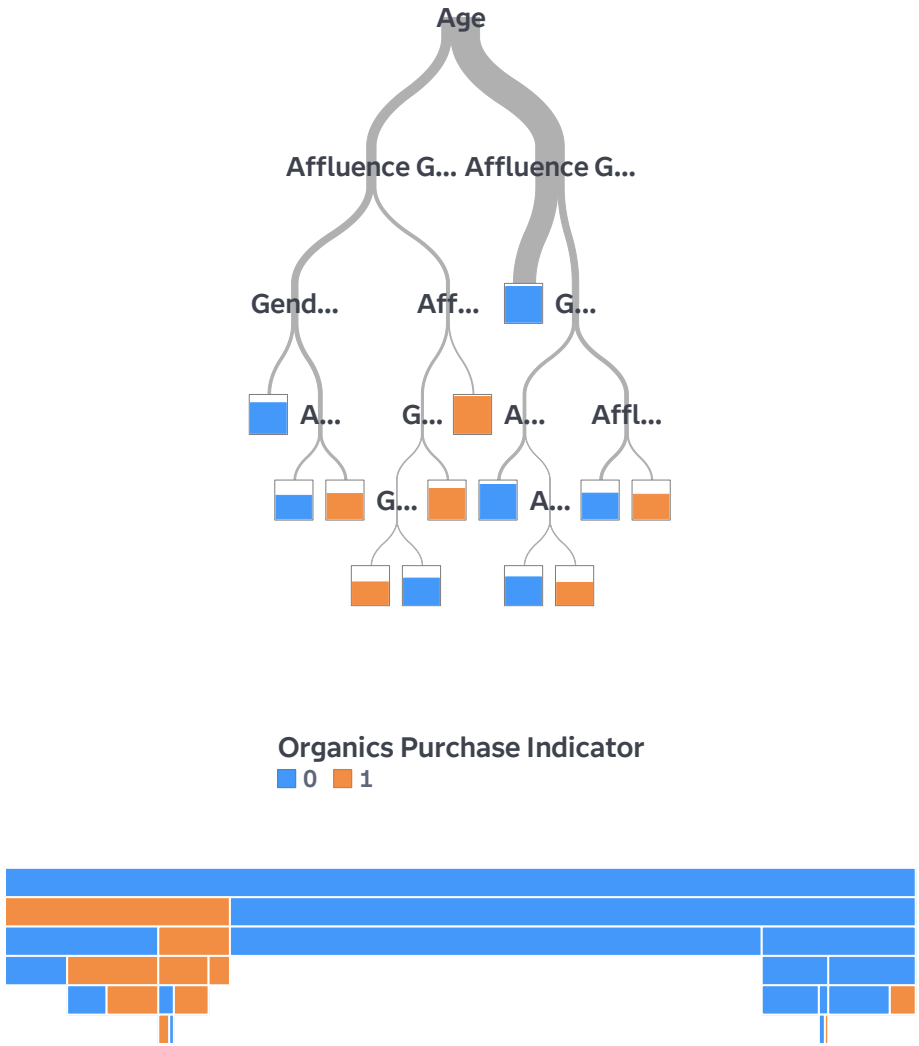

Fréquence sur Gender 3

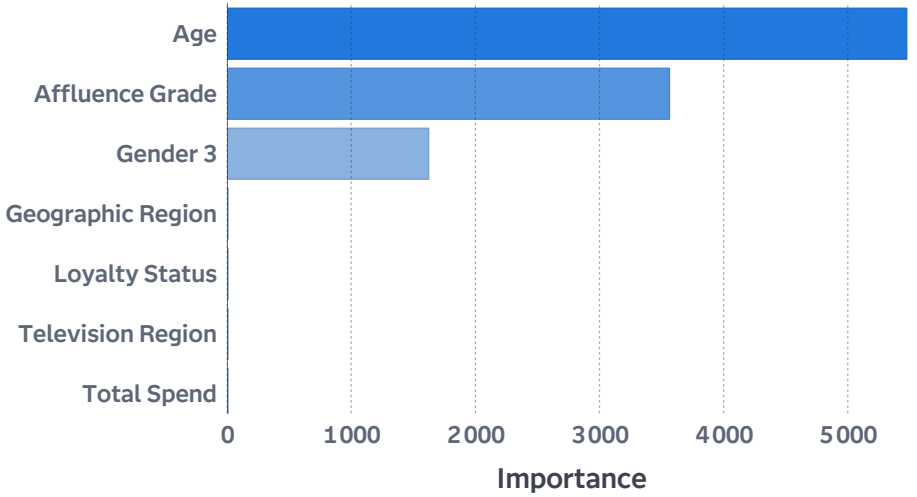

Arbre de décision sur Organics Purchase Indicator

Événement : 1 Ajusté : KS (Youden) 0,4707 Observations : 111 k sur 111 k

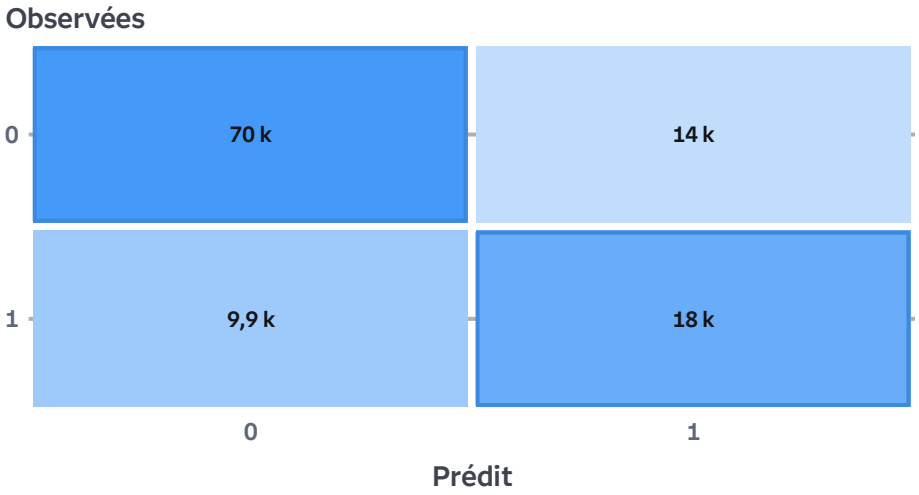

Arbre

Importance des variables

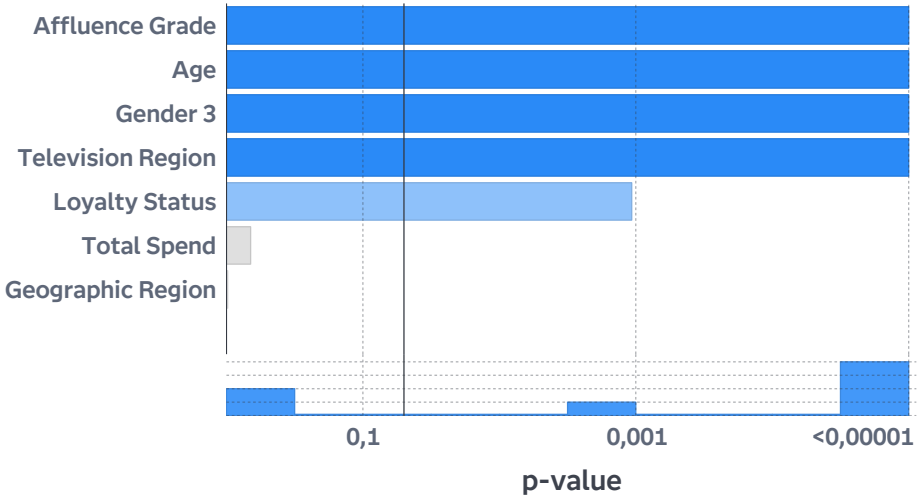

Matrice de confusion

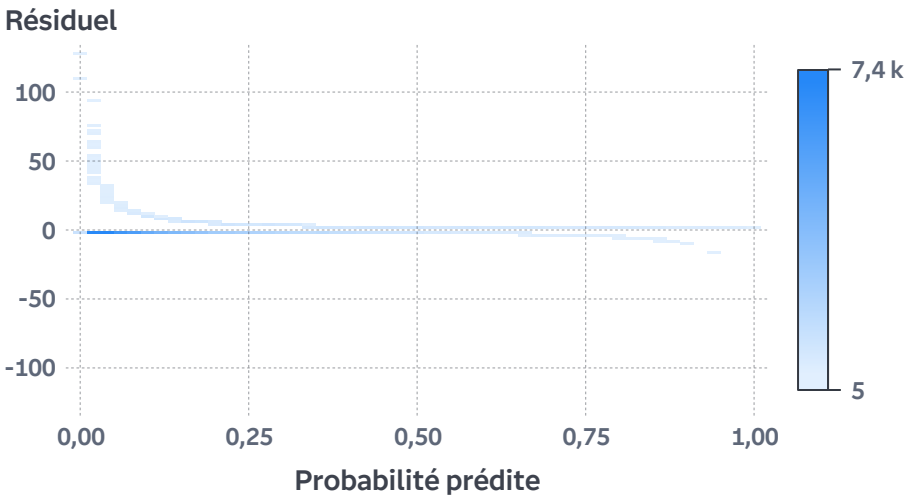

Régression logistique sur Organics Purchase Indicator

Événement : 1 Ajusté : KS (Youden) 0,4663 Observations : 97 k sur 111 k

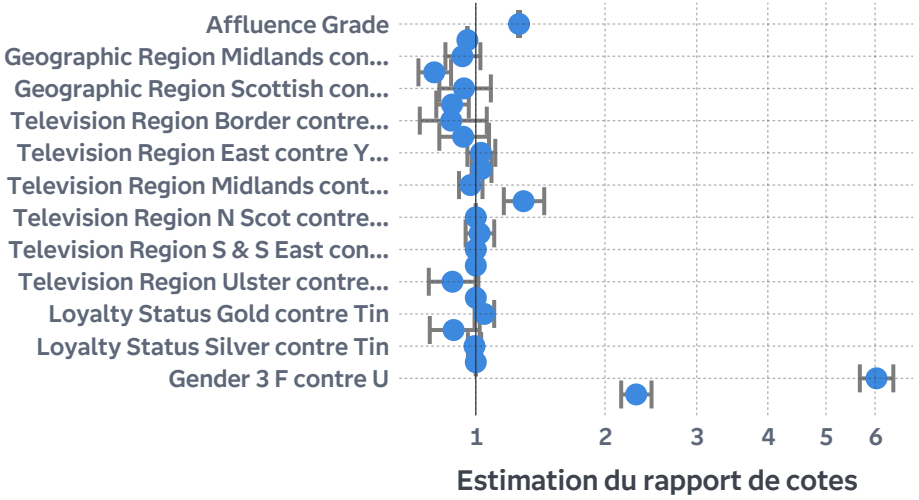

Synthèse de l'ajustement

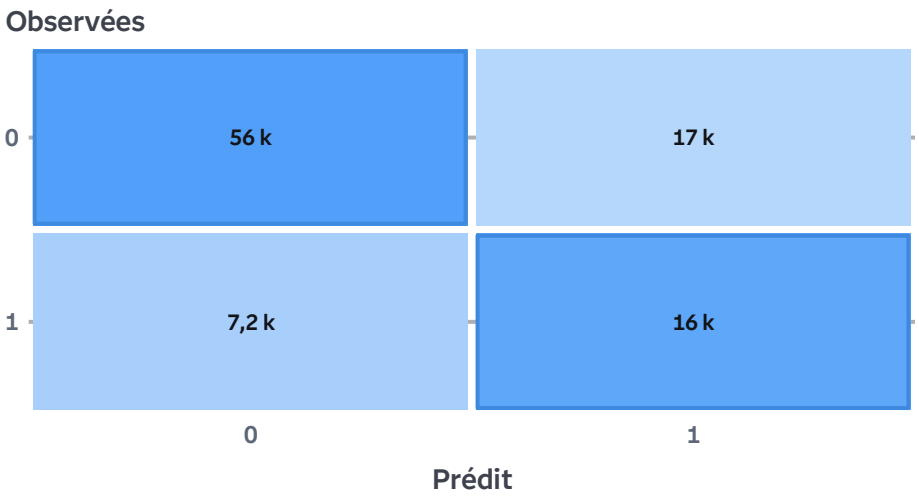

Courbe résiduelle

Courbe du rapport de cotes

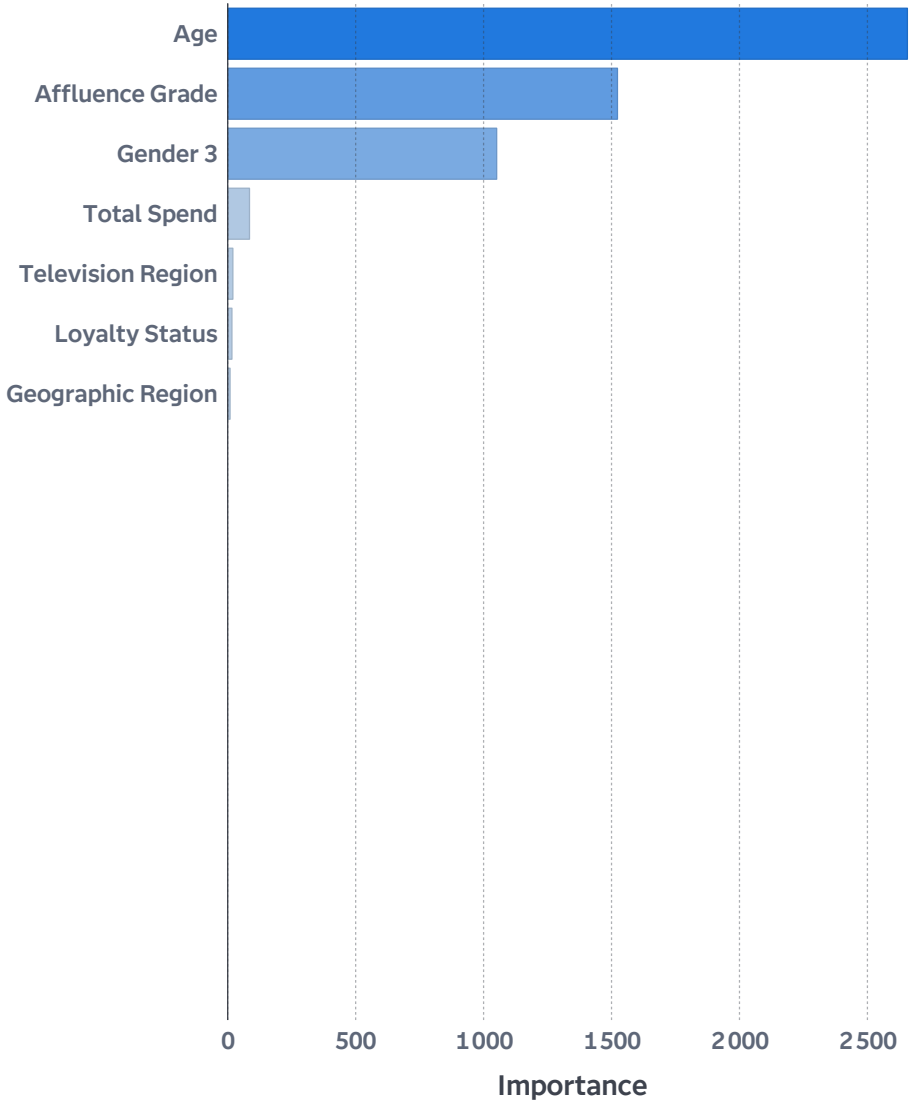

Matrice de confusion

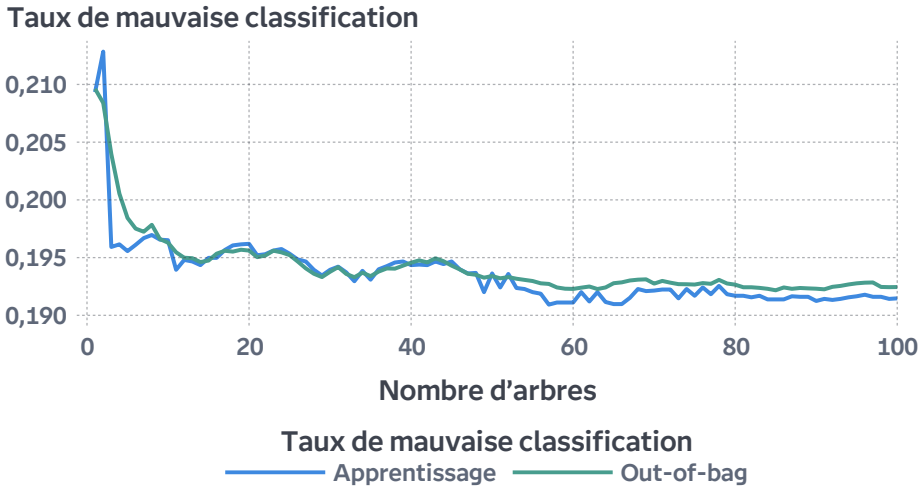

Forêt sur Organics Purchase Indicator

Événement : 1 Ajusté : KS (Youden) 0,4759 Observations : 111 k sur 111 k

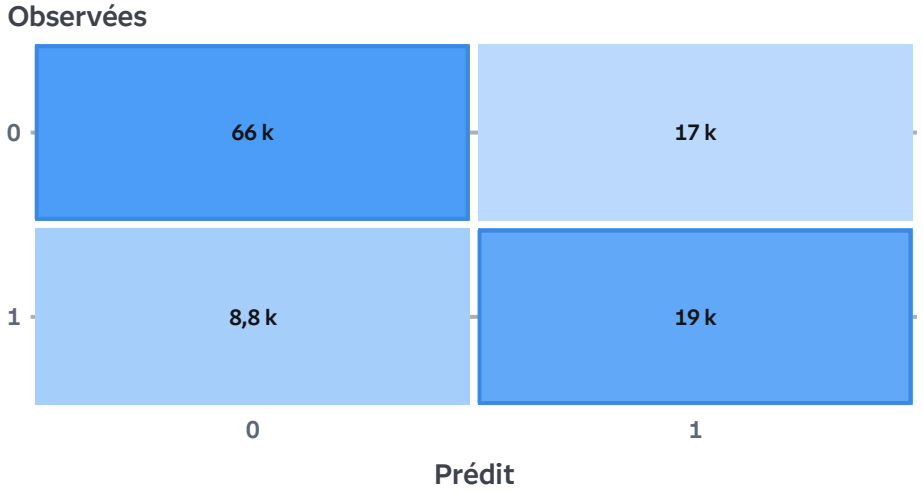

Importance des variables

Graphique des erreurs

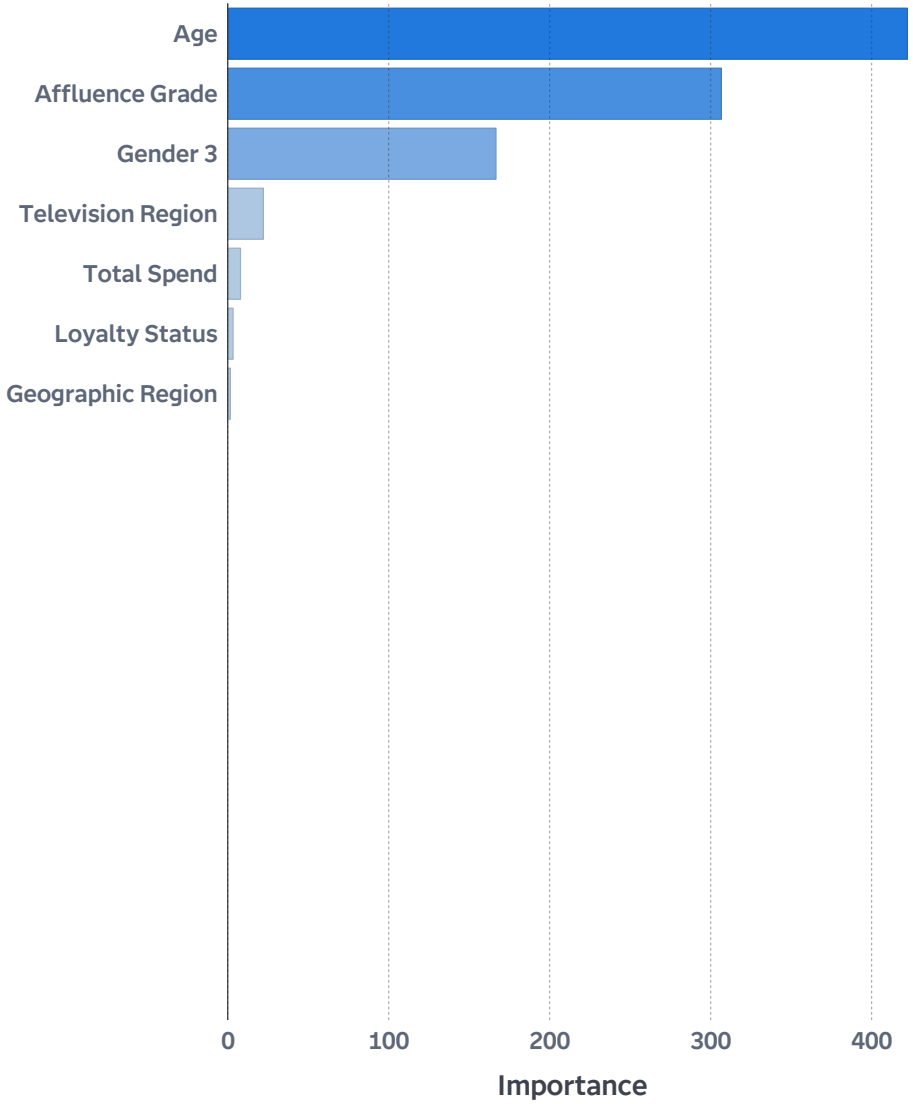

Matrice de confusion

Gradient Boosting sur Organics Purchase Indicator

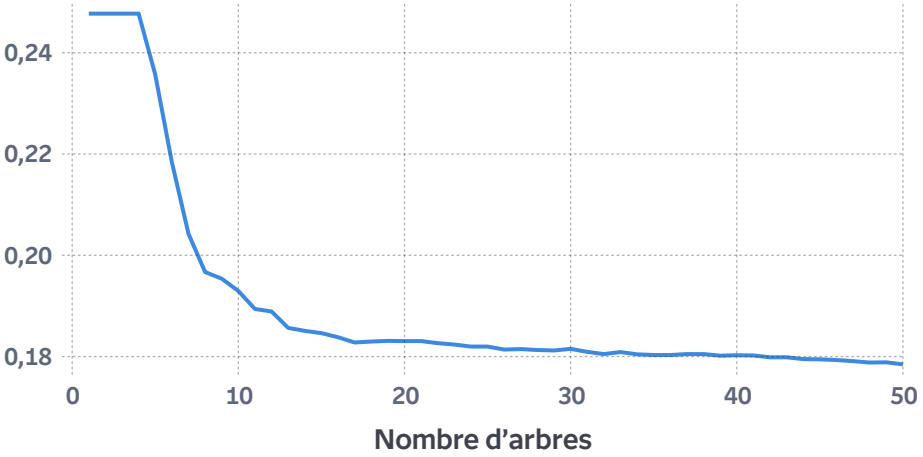

Événement : 1 Ajusté : KS (Youden) 0,5098 Observations : 111 k sur 111 k

Importance des variables

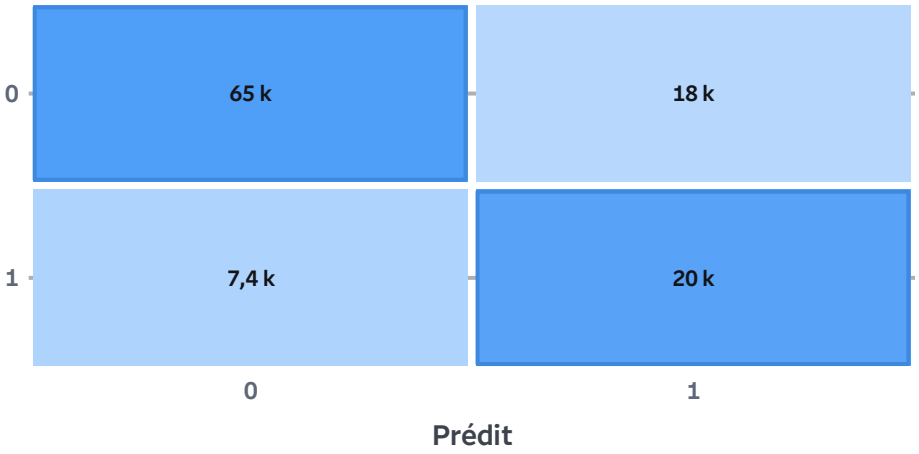

Graphique des itérations

Taux de mauvaise classification

Matrice de confusion

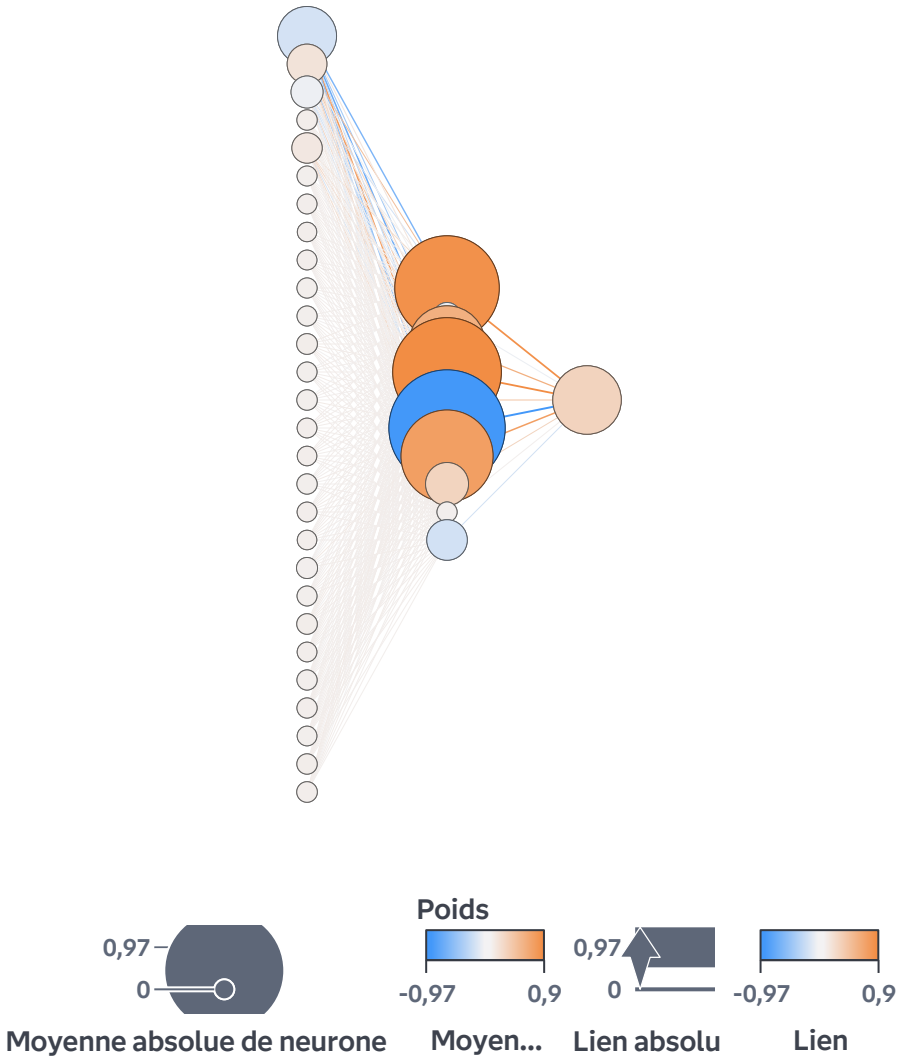

Observées

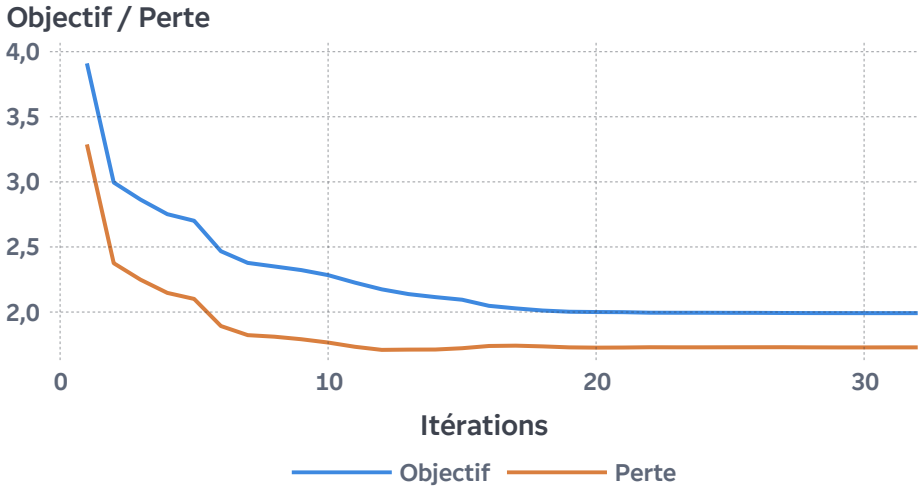

Réseau de neurones sur Organics Purchase Indicator

Événement : 1 Ajusté : KS (Youden) 0,4632 Observations : 97 k sur 111 k

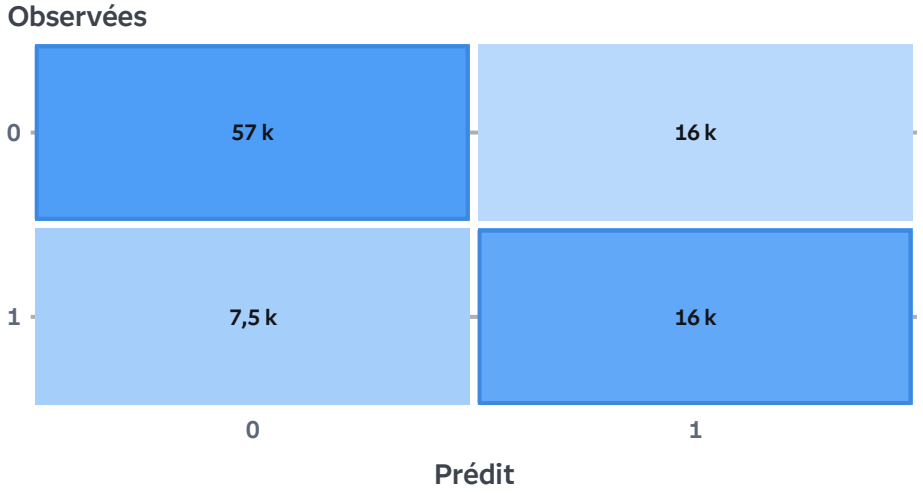

Réseau

Graphique des itérations

Matrice de confusion

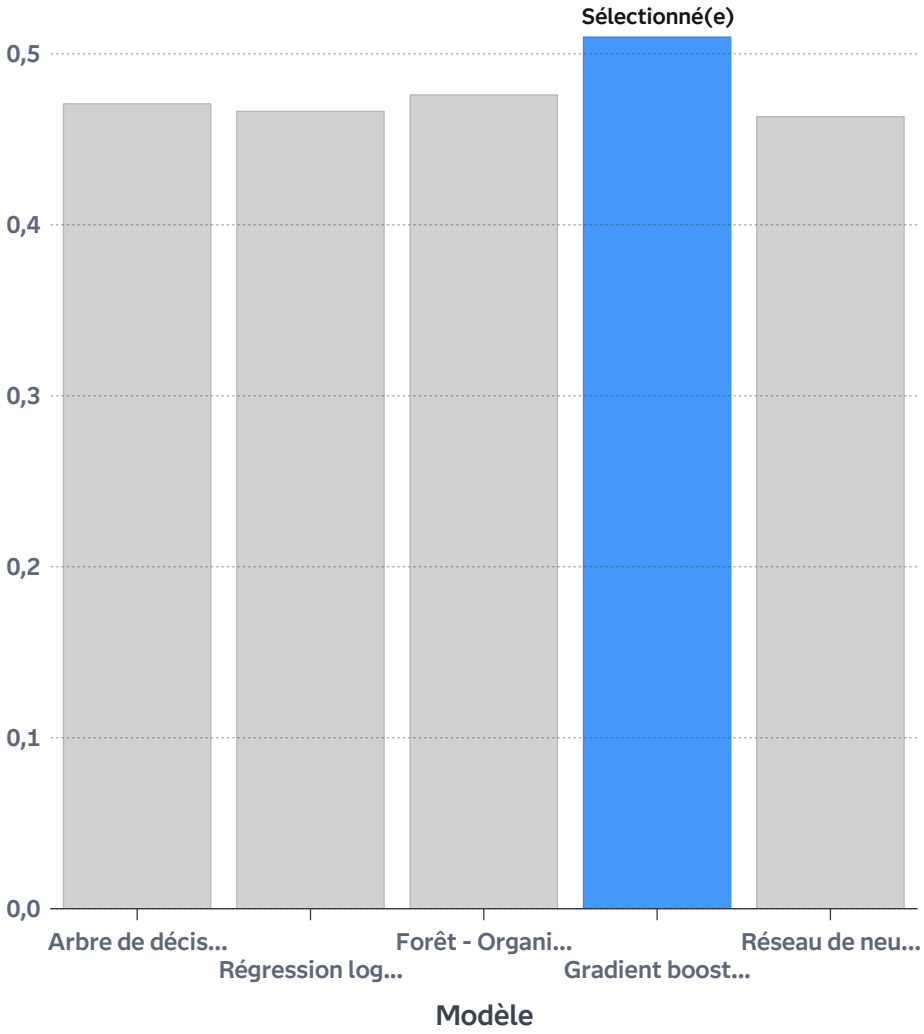

Comparaison de modèles sur Organics Purchase Indicator

Événement : 1

Test d'ajustement

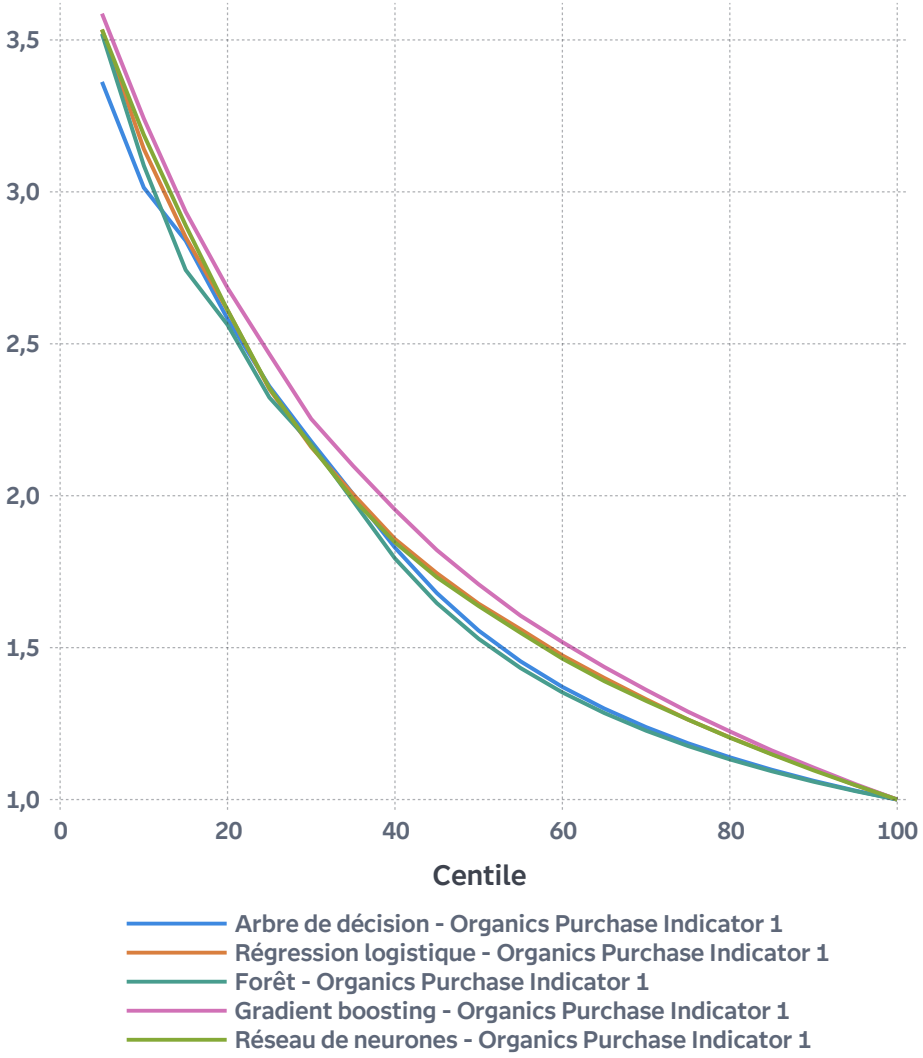

KS (Youden)

A1.1

Lift

Lift cumulé

Annexe

A1.1 Test d'ajustement

Avertissements : Le nombre d'observations pour tous les modèles ne correspond pas.
